Year 4 - Autumn Term: Moving Mountains

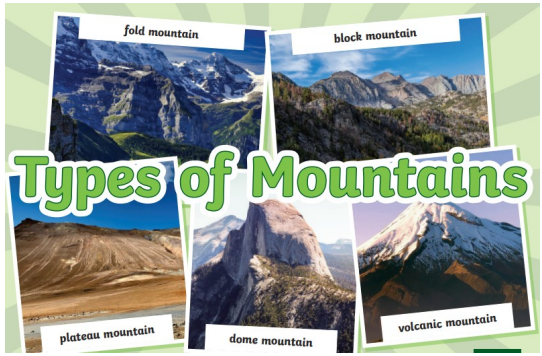

gradient	How steep a hill is
contours	Lines on an OS map showing how steep the land is.
hemisphere	The UK is in the Northern hemisphere. North of the equator.
altitude	Height above sea level
Adi Tribe	The Adi Tribe are farmers who live in the foothills of the Himalayas in the far north east of India.
Avalanche	A large amount of snow or racks falling down a mountainside
adaptation	Characteristics that enable animals and plants to live in a certain place

On an OS map (Ordanance Survey) the closer together the lines , the steeper the gradient.

What is the impact of tourism in Mountain regions?

Advantages of Tourism

- Creates jobs
- Encourages local crafts
- Improved living standards

Disadvantages of Tourism

- Higher prices of land and food
- Pollution from traffic
- Erosion
- Litter
- More crowded
- Trees felled to supply timber and fuel wood
- Lost of cultural identity among the mountain people

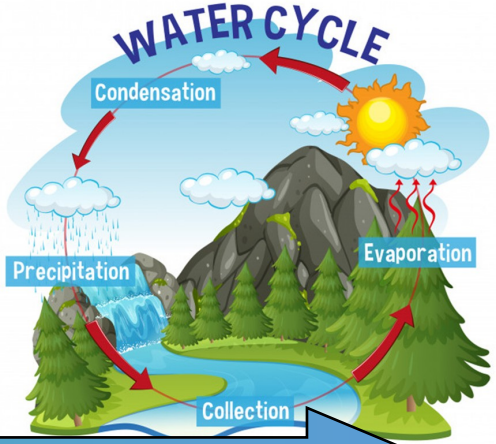

The Adi tribe - Himalayas

Edelweiss

Famous mountain peaks and their heights above sea level

Ben Nevis (Scotland)	Mt Fuji (Japan)	Mont Blanc (France)	Everest (Nepal)
1345 metres	3778 metres	4810 metres	8,848 metres
