Y3 Computing Knowledge Organiser – Time to Travel

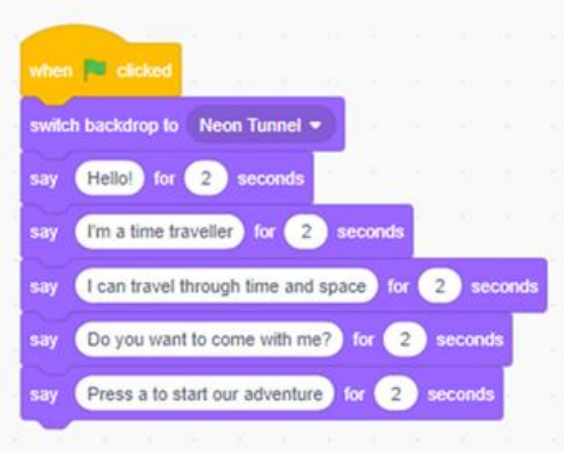

Vocabulary	
Upload	To transfer.
Input	A method of computers receiving data (e.g. keyboard, mouse, touch, sensors, etc.)
Output	A response made by computers to the user (e.g. audio [sound], visual [images], motion)
Network	Interconnected computers/devices that can share data and resources with one another.
File Explorer	A file browser found in every version of Microsoft Windows since Windows 95. It is used to navigate and manage the drives, folders, and files on your computer.

Building your Scratch project

Create Scratch → Switch → Add keyboard → Add outputs → Debug

Key Facts

The script runs in a sequence from the top to bottom.

If there are mistakes in the code, the game will not work properly (you will need to debug).

To fix the mistake, find the right script and read through the blocks to find the mistake.

Uploading an image to create a backdrop
