## Cultural Aspect—Dialling abroad

When dialling telephone numbers in other countries, you need to put in a dialling code so that you know that the number is in another country. The dialling code goes before the telephone number you have, and sometimes you see the 00 written as a +.

The German country code is 0049, and it's 0044 for the UK. Calling Green Ridge from abroad would be +44(1296326320) or 00441296326320.
